Alley
Paving
San
Bernardino

Director of Public Works Shone reported on proposed paving of the alley west of Orange Street between San Bernardino Avenue and Dreka Street. Mr. Shone stated that the no-parking area required by installation of the signal light at Orange Street and San Bernardino Avenue includes the entire block. He added that the approximate cost for paving the alley at its present fifteen foot width would be \$1800, and that a plan had been proposed in which each property owner would participate in the amount of about \$36.00 per lot, which would provide approximately \$880 of the necessary funds. It was reported previously that the property owners were not interested in this participation. Following an expression of responsibility for the inconvenience to residents due to the removal of parking in front of residences brought about by installation of the signal light, Council elected to pave the alley as described by Mr. Shone from San Bernardino Avenue to Dreka Street, on motion of Councilman Knudsen, seconded by Councilman Cummings.
